

CALIFORNIA AGRICULTURAL EMPLOYMENT AND EARNINGS BULLETIN

May 1996

ANNUAL AVERAGES 1995

This bulletin covers 27 agricultural industries statewide, and from five to seventeen industries in each of six regions. The regions are the San Joaquin Valley, South Coast, Desert, Central Coast, Sacramento Valley, and North Coast (refer to map for details). The data are organized into sets of tables by state and region:

- Wage and Salary Workers (Table A).
- Agricultural Production Workers (Table B).
- Average Weekly Earnings of Production Workers (Table C).
- Average Hours Worked by Production Workers (Table D).
- Average Hourly Earnings of Production Workers (Table E).

NOTE: Data in this bulletin are now available electronically through a personal computer and modem. Our Labor Market Information Division's new bulletin board system, LMI On-Line, can be accessed by dialing (916) 262-2BBS (262-2227).

Employment figures in this report classify workers by specific crop or service industry, except for those working in Farm Labor Contracting and Management Services, who may work in any crop or service. The data in this report count only workers employed during the week of the month which contains the 12th day of the month.

The two types of agricultural employees addressed in this report are (1) wage and salary workers, and (2) production workers. Wage and salary workers are all employees receiving compensation from agricultural employers, and include production workers, managers, supervisors, office personnel, and all other staff. Production workers are employees directly involved in the actual production process and exclude managers, supervisors, office personnel, and all other staff who do not engage in production activities. More than 90% of all workers employed by agricultural businesses are production workers.

Average annual agricultural wage and salary employment for the State of California was 368,000 in 1995. Agricultural employment began the year at a low of 272,600 in January, then increased to a high of 451,000 during the September harvest. The seasonal difference was 178,400 workers. (Table 1A.)

The 1995 employment figures show that 49 percent of the state's agricultural workers were employed in the San Joaquin Valley region. The South Coast and Central Coast regions had the next largest shares of agricultural employment with 16 percent and 15 percent respectively. Agricultural employers in the Desert region hired 9 percent of the agricultural workers in the state. The Sacramento Valley and the North Coast regions employed 7 and 4 percent respectively. These percentages are quite similar to the previous year's percentages, indicating that employment fluctuations between regions are not significant.

Wage and Salary Workers in Agricultural Establishments

Annual Average

1995

(In Thousands)

Industry	State-wide	San Joaquin	South Coast	Central Coast	Desert	Sacramento	North Coast
Total Agricultural	368.0	181.1	58.9	53.4	34.2	26.0	13.1
Total Crops	200.1	80.6	41.1	34.0	13.8	17.9	9.5
Total Livestock	25.2	13.9	2.0	1.1	4.8	1.8	1.8
Total Services	142.8	86.6	15.8	18.3	15.6	6.4	1.9

Source: Tables 1-A through 7-A.

The 1995 statewide annual average employment level for agricultural production workers was 340,500. Agricultural production worker employment began the year at a low of 246,000, then peaked in September at a level of 422,300. The difference between the September high and the January low was 176,300. (Table 2A.)

In 1995, the average difference between total agricultural wage and salary employment and production worker employment was 27,500. This number, which represents agricultural administrative employment and is 7.5 percent of total agricultural employment, has remained remarkably consistent over the past few years. These administrative workers appear to be permanent, year-round employees unaffected by seasonal influences, since this figure is virtually constant throughout the year. It can be deduced that there is approximately one manager, supervisor, office worker, or other staff for every 13 production workers.

Production Workers in Agricultural Establishments

Annual Average

1995

(In Thousands)

Industry	State-wide	San Joaquin	South Coast	Central Coast	Desert	Sacramento	North Coast

Source: Tables 1-B through 7-B.

MAJOR REGIONAL ACTIVITIES

The San Joaquin Valley is the premier crop producing area in the world. It is California's largest employer in Grape, Cotton, and Dairy Farm production, Farm Labor Contracts, and Farm Management Services. The South Coast region is the state's largest employer in Horticultural Specialties, and comes in second in production of Vegetables and Melons, Berries, Farm Labor Contractors, and Management Services. The Central Coast region is the largest employer in Berries, and Vegetables and Melons, and is the second largest employer in Horticultural Specialties. The Sacramento Valley region employs the most workers in Rice production. The Desert region ranks second in employment on Dairy Farms, while the North Coast is the second largest employer in Grape production.

WAGE AND SALARY EMPLOYMENT CHANGES BETWEEN 1994 AND 1995

In 1995, California's annual average agricultural employment was 17,700 above the 1994 average of 350,300. The San Joaquin Valley region had the largest regional employment increase, which occurred in its agricultural services activities. The largest regional employment decrease occurred in crop production in the Central Coast region. The annual average for total agricultural employment in 1995 increased approximately five percent overall from the previous year.

HOURS WORKED AND EARNINGS OF PRODUCTION WORKERS IN 1995

California's agricultural production employees worked an average week of 41.8 hours during 1995, exactly the same per week as the 1994 average. The annual average weekly hours in 1995 ranged from 40.3 hours in the Desert region to 46.2 hours in the Sacramento Valley region. (Tables 1-D through 7-D.)

Average annual weekly earnings in 1995 were \$279.22, an increase of \$2.92 per week over the 1994 annual average of \$276.30. The North Coast region had the highest average annual weekly earnings at \$310.42. The lowest average annual weekly earnings was \$268.80 in the Desert region. (Tables 1-C through 7-C.)

Average Hourly Earnings of Production Workers

Annual Average
1995

Industry	State-wide	San Joaquin	South Coast	Central Coast	Desert	Sacramento	North Coast
Total Agricultural	\$6.68	\$6.38	\$6.69	\$7.34	\$6.67	\$6.43	\$7.48
Total Crops	6.64	6.35	6.53	7.17	6.37	6.49	7.33
Total Livestock	7.40	7.47	7.62	7.54	7.58	6.54	7.14
Total Services	6.59	6.21	7.02	7.68	6.59	6.24	8.60

Source: Tables 1-E through 7-E.

The statewide annual average for agricultural hourly earnings was \$6.68 in 1995, an increase of seven cents from the 1994 amount of \$6.61. The lowest pay rate occurred in Deciduous Tree Fruits at \$5.78 an hour, whereas the highest pay rate occurred in Soil Preparation Services at \$9.42 an hour. Of the three major employment components of California's agriculture (Crops, Livestock, and Services): Livestock had the highest and most stable hourly earnings average at \$7.40; Crops were \$6.64; and Agricultural Services were \$6.59. Annual average hourly earnings for all agricultural activities were highest in the North Coast region (\$7.48) and lowest in the San Joaquin Valley region (\$6.38). (Tables 1-E through 7-E.)

PRODUCTION WORKER EMPLOYMENT CHANGES BETWEEN 1994 AND 1995

The average number of agricultural production workers in California increased by 16,800 from the 1994 average of 323,700. This represents a five percent increase from 1994 to 1995.

DATA SOURCES:

The data are obtained from two sources: the Employment Development Department (EDD) Unemployment Insurance (UI) files, and the monthly Current Employment Statistics for Agriculture survey. This survey of 4,000 agricultural employers is conducted by the Labor Market Information Division. This sample, about 14% of all agricultural employers, was selected to be statistically representative of the state's agricultural employers by size, geographic location and industry categories. The employers in this sample employ over 40% of the total agricultural labor force in California.

Sample data are gathered for the week that includes the 12th calendar day of the month; thus all data in this publication represent activities taking place during this mid-month period.

DATA COMMENTS:

**FIGURES FOR THE STATE AND SIX REGIONS ARE INDEPENDENTLY DERIVED.
THEREFORE, THE SUM OF THE REGIONAL AMOUNTS WILL NOT NECESSARILY EQUAL
THE STATEWIDE TOTAL.**

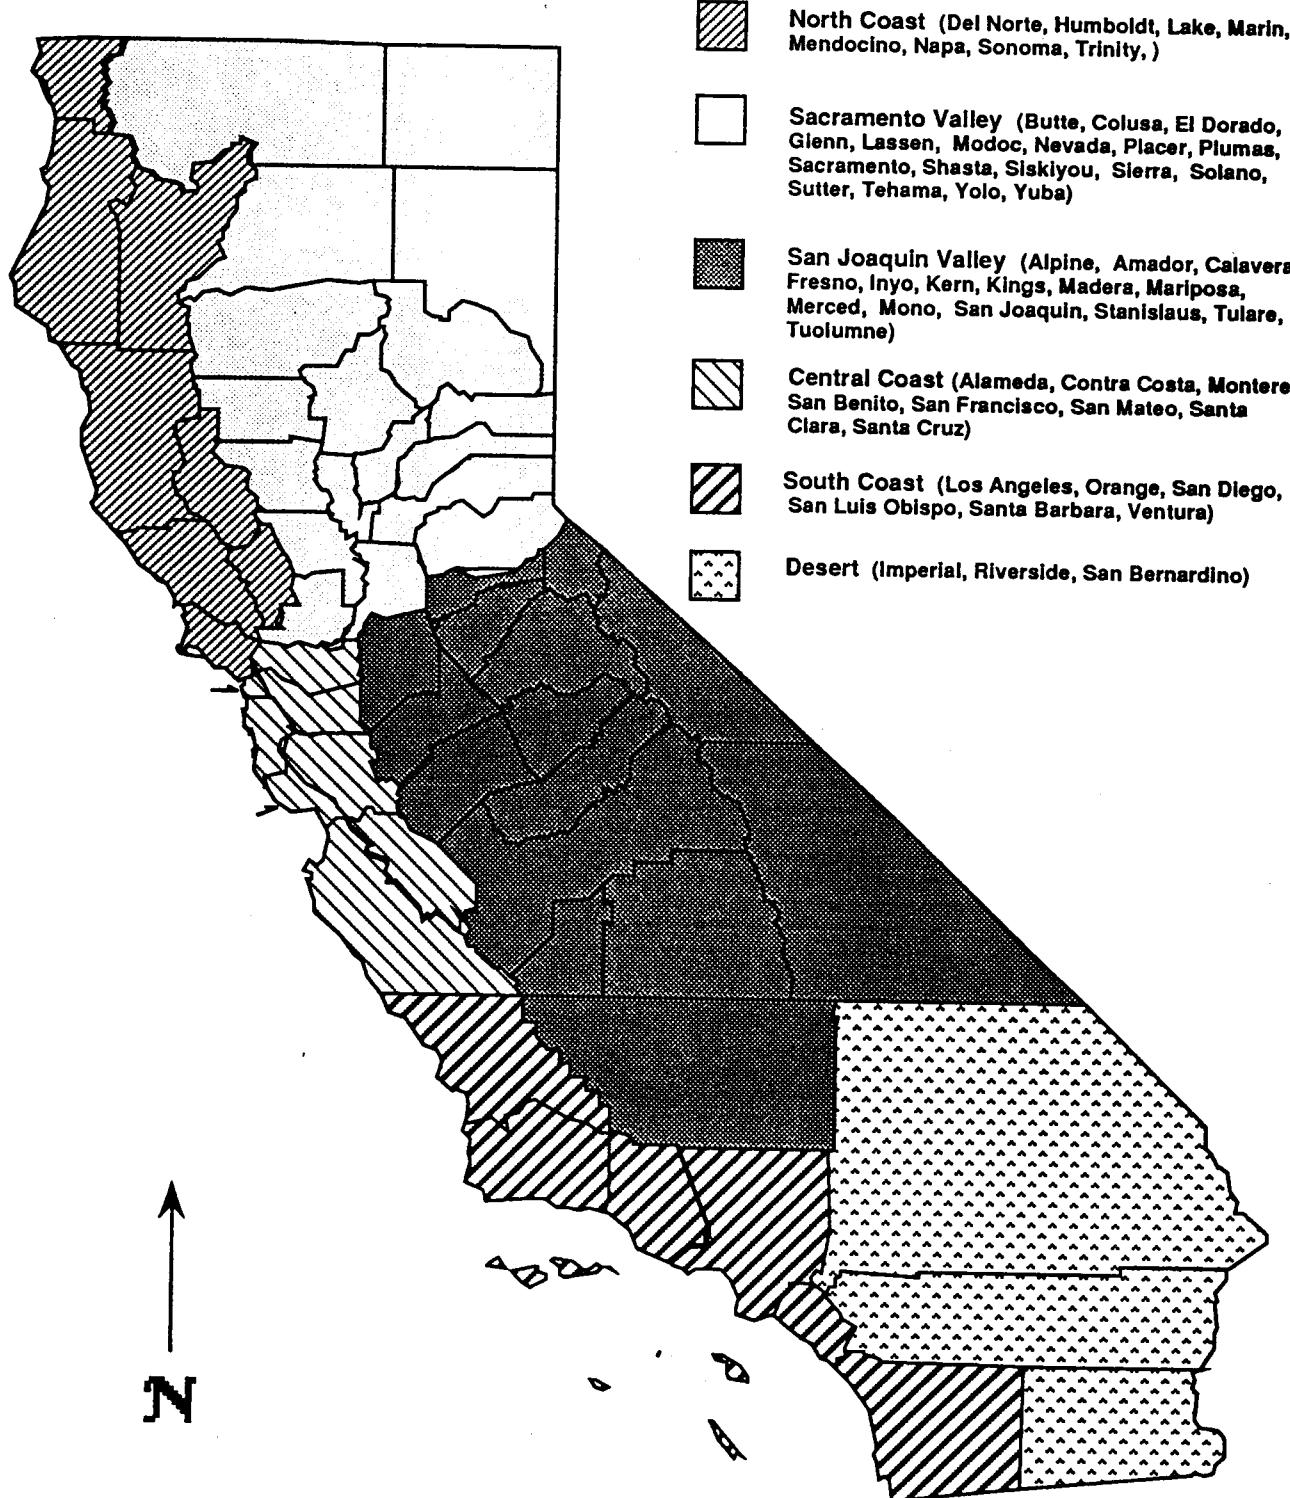

**AVERAGES FOR EACH INDUSTRY ARE DERIVED BY ADDING 12 MONTHS OF DATA AND
DIVIDING BY 12. THEREFORE, THE SUM OF THE INDIVIDUAL INDUSTRIES WILL NOT
NECESSARILY ADD TO THE SUBTOTALS AND/OR TOTALS.**

To aid in accurate usage and interpretation of the data, please note the following:

- Employment data do not include employers or unpaid family workers.
- Figures in this bulletin will differ from other agricultural numbers published by this department because of differences in the number of agricultural industries covered and in the definition of workers.

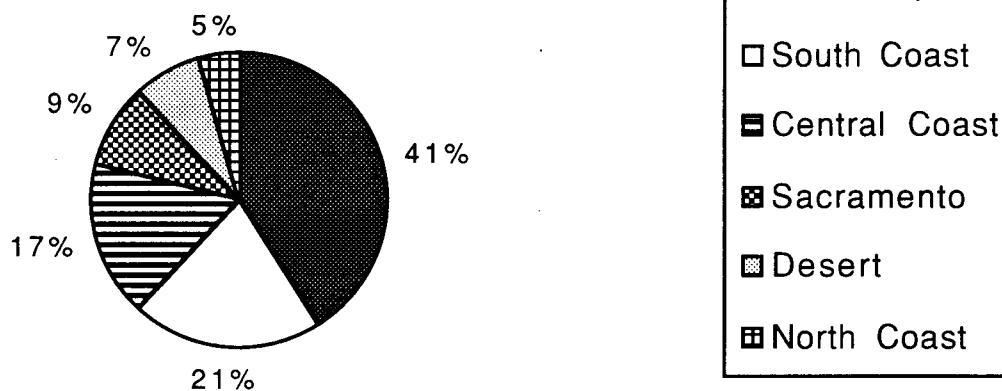

If you wish to be placed on our mailing list to receive future issues of this publication or the monthly California Agricultural Employment and Earnings Bulletin, please send your name and address to: *Information Services Group, Labor Market Information Division, Employment Development Department, P.O. Box 826216, Sacramento, CA 94299-9994 or call (916) 262-2358.*
